

Adopt a proactive and continuous approach to managing exposures

The threat landscape is evolving faster than ever. To stay ahead, organizations must shift from static defenses to a continuous, adaptive security approach that proactively identifies, prioritizes, and mitigates threats in real time. PlexTrac transforms how security teams detect, prioritize, and remediate risks by shifting from static assessments to a continuous, automated, and intelligence-driven defense strategy.

Evolve Into Continuous Threat and Exposure Management

Centralize security data, contextually prioritize risk, and automate remediation workflows to streamline the CTEM lifecycle in one platform – enabling security teams to move beyond periodic assessments to continuous exposure management.

Benefits of Leveraging PlexTrac:

One platform to manage all consolidated security data

Consolidate results from toolsets and manual testing into one platform. Maintain visibility across your entire attack surface and continuously monitor assets.

Automatically prioritize risk by enriching findings with a contextual risk score

Build fully-configurable risk scoring equations that leverage business-context – such as asset criticality – to meet your organizational needs, industry requirements, or risk appetite when it comes to automatically prioritizing issues for remediation.

Automate and mature remediation workflows

Speed mobilization by automating remediation workflows. Use trigger events to automate actions – such as auto-creating a ticket in Jira when a new critical finding emerges. Integrate security and collaboration tools (Jira, ServiceNow, Slack, etc.) to tie into existing workflows.

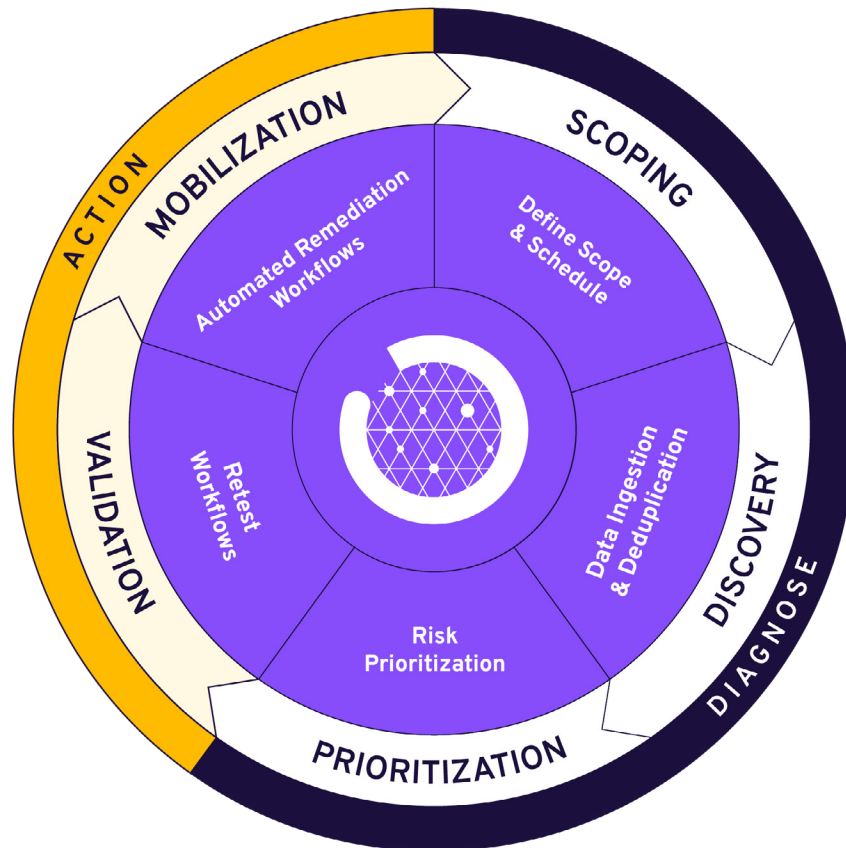

Analyze data in real-time with dynamic visualizations

Access real-time insights to make data-driven decisions and communicate risk effectively across your organization. Customize dynamic dashboards for any audience.

Automate the CTEM Lifecycle With PlexTrac

PlexTrac is a versatile exposure assessment platform that aligns with the CTEM framework, offering comprehensive solutions for threat exposure management.

“PlexTrac’s new risk-based prioritization capabilities will help us shift from point-in-time testing to more continual engagements – enabling us to provide deeper value to each client by customizing a contextual risk scoring equation that clearly communicates their highest impact risks on an ongoing basis.”

– *Echelon Risk + Cyber*

“PlexTrac’s contextual risk scoring engine streamlines and adds logic into our workflow to drive additional value for our clients by readily communicating their highest impact risks so they can focus in on these areas.”

– *Ideal Integrations*

“PlexTrac is foundational to our ongoing security and risk management and vCISO offerings.”

– *CAI*
